---

## Professional Summary

Computer Engineer with over 8 years of experience in web development and project management. Fullstack Developer specialized in the MERN stack and modern technologies such as React Native and Supabase, with a proven track record of leading multidisciplinary teams to deliver scalable, high-performance web applications. Demonstrated history of improving project outcomes through effective collaboration, technical expertise, and agile methodologies. Active integration of AI tools into development workflows.

---

## Professional Experience

Confidential Company (NDA) | *Fullstack Developer*

**July 2025 – Present | Venezuela (Remote)**

- Architected and developed 4+ core SaaS modules serving multiple user roles, reducing manual workflow time by an estimated 30%.
  - Built responsive, high-performance interfaces with **Tailwind CSS**, improving UI consistency across the platform.
  - Reduced development iteration time by ~40% by integrating AI tools — **GitHub Copilot Pro**, **Gemini CLI**, and **Perplexity Pro** — into daily coding and documentation workflows.
  - Spearheaded database architecture design using **PostgreSQL** and **Supabase**, ensuring scalable and secure data management.
- 

Alberta TechWorks | *Fullstack Developer & Project Manager*

**April 2022 – September 2024 | Alberta, Canada (Remote)**

- Led 6+ full-cycle web projects using **Angular**, **React.js**, **Django**, and **Node.js**, improving system scalability by **50%** through optimized microservices architecture.
  - Implemented **CI/CD** pipelines with GitHub Actions and Docker, reducing deployment errors by **80%** and cutting delivery time by **60%**.
  - Managed a team of 5+ developers across 3 countries, achieving a **95%** on-time delivery rate while consistently exceeding stakeholder expectations.
  - Defined KPIs and project milestones, reducing post-launch bug reports by **70%** across all delivered products.
  - Partnered with stakeholders to align technical goals with business objectives, ensuring product vision consistency.
-

Interfell | *Frontend Developer*

October 2021 – March 2022 | Remote (Costa Rica)

- Built and optimized frontend features for enterprise dashboards using **React.js**, **Redux**, **Chart.js**, and **Material UI**.
- Drove alignment with UI/UX teams to deliver responsive interfaces, contributing to a **40%** increase in user engagement.
- Served as interim project manager, organizing sprints and coordinating cross-team deliveries to meet tight deadlines.

Freelance | *Fullstack Developer*

November 2017 – Present | Remote

- Delivered 20+ client projects using **React**, **Django**, **Node.js**, and **WordPress**, achieving 100% on-time delivery and a 95%+ client satisfaction rate.
- Reduced average project delivery time by 25% through reusable component architecture and standardized deployment workflows.
- Designed UI prototypes in **Figma** and translated them into pixel-perfect web interfaces across devices.
- Consulted clients on scalable architecture and deployment strategies, reducing long-term maintenance costs.

Education

**Bachelor's Degree in Computer Engineering** — Universidad José Antonio Páez 📍 Valencia, Venezuela | 🎓 June 2020
