FOCUS

- AI-assisted engineering
- Frontend product systems
- Modern backend & auth

Frontend-focused Fullstack Developer

AI-assisted engineering · Modern backend · Remote delivery

PROFESSIONAL SUMMARY

Computer Engineer with 8+ years of experience in web development and project delivery. I specialize in frontend-leaning fullstack work across React, React Native, Node.js, Django, PostgreSQL, MongoDB, Supabase, Prisma, and Better Auth, combining product thinking, clean UI execution, and pragmatic architecture. I actively use AI coding models, agents, MCP servers, and skill-based workflows with tools such as OpenCode and Codex to accelerate implementation, debugging, documentation, and technical decision-making while maintaining engineering control.

CORE STRENGTHS

Frontend systems with product polish

Builds responsive, accessible interfaces with React, Angular, Tailwind CSS, Material UI, and component-driven patterns that scale beyond a single screen.

Fullstack architecture

Connects UI delivery with reliable APIs, Prisma-backed data modeling, relational and document databases, Better Auth authentication flows, and deployment-ready backend decisions.

Delivery leadership

Coordinates multidisciplinary remote teams, aligns technical milestones with business goals, and reduces delivery risk through clear KPIs and agile execution.

AI-assisted engineering

Applies AI coding models, agents, MCP, and skill-based workflows with OpenCode, Codex, GitHub Copilot, and Gemini CLI to accelerate delivery without sacrificing review discipline or architectural control.

PROFESSIONAL EXPERIENCE

Confidential Company (NDA) — Fullstack Developer

July 2025 – Present | Venezuela · Remote

Developing core SaaS capabilities for multiple user roles with a focus on interface consistency, workflow automation, and scalable data architecture.

- Architected and developed 4+ core SaaS modules serving multiple roles, reducing manual workflow time by an estimated 30%.
- Built responsive, high-performance interfaces with Tailwind CSS, improving UI consistency across the platform.
- Reduced development iteration time by roughly 40% by integrating OpenCode, Codex, GitHub Copilot, Gemini CLI, AI agents, MCP, and skill-based workflows into daily coding, debugging, and documentation routines.
- Designed PostgreSQL, Supabase, Prisma, and Better Auth backend foundations to support scalable data access, secure authentication, and product growth.

Stack: React, Tailwind CSS, PostgreSQL, Supabase, Prisma, Better Auth, AI-assisted development

Alberta TechWorks — Fullstack Developer & Project Manager

April 2022 – September 2024 | Alberta, Canada · Remote

Led full-cycle product delivery across frontend, backend, DevOps, and stakeholder coordination for distributed teams.

- Led 6+ full-cycle web projects using Angular, React.js, Django, and Node.js, improving system scalability by 50% through optimized microservices architecture.
- Implemented CI/CD pipelines with GitHub Actions and Docker, reducing deployment errors by 80% and cutting delivery time by 60%.

FOCUS

- AI-assisted engineering
- Frontend product systems
- Modern backend & auth

- Managed a team of 5+ developers across 3 countries, achieving a 95% on-time delivery rate while exceeding stakeholder expectations.
- Defined KPIs and project milestones that reduced post-launch bug reports by 70% across delivered products.
- Partnered with stakeholders to align technical goals with business objectives and maintain product vision consistency.

Stack: Angular, React, Django, Node.js, Docker, GitHub Actions

Interfell — Frontend Developer

October 2021 – March 2022 | Costa Rica · Remote

Built enterprise dashboard features and collaborated closely with UI/UX teams to improve user-facing product quality.

- Built and optimized frontend features for enterprise dashboards using React.js, Redux, Chart.js, and Material UI.
- Aligned with UI/UX teams to deliver responsive interfaces, contributing to a 40% increase in user engagement.
- Served as interim project manager, organizing sprints and coordinating cross-team deliveries under tight deadlines.

Stack: React, Redux, Chart.js, Material UI

Freelance — Fullstack Developer

November 2017 – Present | Remote

Delivered production websites and applications for clients while standardizing reusable delivery patterns.

- Delivered 20+ client projects using React, Django, Node.js, and WordPress with 100% on-time delivery and 95%+ client satisfaction.
- Reduced average project delivery time by 25% through reusable component architecture and standardized deployment workflows.
- Designed UI prototypes in Figma and translated them into pixel-aligned web interfaces across devices.
- Consulted clients on scalable architecture and deployment strategies, reducing long-term maintenance cost.

Stack: React, Django, Node.js, WordPress, Figma

TECHNICAL SKILLS

Frontend & UI

React.js, React Native, Angular, Next.js, Vue.js, Tailwind CSS, Material UI, Styled Components, Redux, Figma, HTML, CSS

Languages

JavaScript, TypeScript, Python, Java, PHP, Ruby

Backend & APIs

Node.js, Django, Laravel, Prisma, Better Auth, GraphQL, REST APIs, Authentication flows

Databases

PostgreSQL, MongoDB, Supabase, SQL, SQLite

DevOps & Cloud

Git, Docker, AWS, GitHub Actions, CI/CD

AI Engineering & Developer Tooling

OpenCode, Codex, AI coding models, AI agents, MCP, Skill workflows, GitHub Copilot Pro, Gemini CLI, Perplexity Pro, Postman, Jira, Power BI, Tableau

EDUCATION & LANGUAGES

Bachelor's Degree in Computer Engineering — Universidad José Antonio Páez

Valencia, Venezuela · June 2020

Spanish: Native · English: Advanced (C1)
